Lifesaving Skills and Safety Preparedness: CPR & Active Shooter Training

At the beginning of August 2025, Radians School faculty and staff came together to participate in two essential professional development sessions: CPR Certification Training and Active Shooter Preparedness Training. These sessions are part of our ongoing commitment to ensuring the safety and well-being of every member of our school community.

Both trainings emphasized a shared responsibility: keeping our school safe and prepared. By investing in these critical skills, Radians School ensures that teachers and staff are not only educators but also guardians of student safety. These sessions serve as a reminder that our dedication extends beyond the classroom—we are committed to building a secure, caring environment where every student can thrive.

CPR Training: Empowering Staff with Lifesaving Skills

During the CPR training, our educators learned and practiced vital techniques for responding to medical emergencies. Instructors guided participants through proper chest compressions, rescue breaths, and the use of Automated External Defibrillators (AEDs). This hands-on training not only provided confidence in responding to emergencies but also highlighted the importance of acting quickly and effectively to save lives.

Active Shooter Preparedness: Prioritizing Safety

In addition to CPR, staff also completed Active Shooter Preparedness Training. Led by safety experts, this session equipped our team with practical strategies for recognizing threats, making quick decisions, and responding in ways that protect students and colleagues. The training reinforced the importance of readiness, communication, and situational awareness in maintaining a safe learning environment.

Innovating with Artificial Intelligence: Building the Future of Learning at Radians

August 2025 www.radiansspotlight.com

A Culture of Innovation

At Radians School, innovation is more than a vision—it's a daily practice woven into the fabric of our classrooms. Every day, our faculty and students are encouraged to explore new tools, strategies, and ideas that make learning dynamic, meaningful, and future-focused. This semester, one of the most exciting steps forward has been the adoption of a cutting-edge AI-powered platform designed to enhance teaching and learning across all grade levels.

Impact in Numbers

In just two months, our classrooms have generated over 1,100 unique student outputs through this tool. The platform has become a trusted partner for lesson planning, personalized learning supports, and creative engagement tools. Students are especially drawn to chatbot interactions, which allow them to practice critical thinking and problem-solving in real time. Teachers, meanwhile, are discovering how this platform saves valuable preparation time while sparking deeper curiosity among learners.

> *AI is not just a tool—it's a bridge to the future of learning at Radians. It empowers our teachers, engages our students, and prepares the next generation with the skills they need to thrive.*

Teacher Champions Leading the Way

The impact has been clear:

- Teacher champions like Prof. Elizabeth Rivera, Prof. Carlos Maldonado, and Prof. Christian Cartagena are leading the way, integrating this platform into their daily practice and inspiring colleagues with innovative strategies.
- Students are experimenting with new forms of collaboration, exploring tools that build not just knowledge, but also the Global Professional Skills (GPS) needed for success in the 21st century.
- The platform is opening doors to differentiated instruction, making it easier to support diverse learning needs and interests.

Expanding the Horizon

While chatbots currently dominate usage, the next step is expanding into task and learning support tools—a move that will deepen curriculum alignment and broaden student impact. Our goal is not just to use technology, but to integrate it meaningfully into Radians' philosophy of an integral education grounded in virtues and innovation.

By adopting the use of artificial intelligence, Radians School is working towards the future: empowering teachers, engaging students, and shaping a community of learners who are ready to thrive in a rapidly changing world.

AURA 2026 HAS ARRIVED!

Radians Pride in Action: Celebrating Academic Excellence

Radians School proudly congratulates Jan Lugo Hernández and Andrés Méndez Roque for being honored with the College Board National Recognition Program Award.

This prestigious recognition is awarded to students who not only maintain a GPA of B+ or higher but also demonstrate exceptional performance on the PSAT/NMSQT®, PSAT™ 10, and/or AP® Exams. Jan and Andrés have distinguished themselves through their academic excellence, discipline, and perseverance, earning a place among the top achievers nationwide.

Their accomplishments are a testament to their commitment to learning and their determination to reach the highest levels of success. For the Radians community, their recognition serves as both a celebration of their hard work and an inspiration to fellow students to strive for excellence in their own academic journeys.

We are incredibly proud of Jan and Andrés for this outstanding achievement. They embody the values of dedication and resilience that define Radians Pride, and we look forward to seeing their continued success in the years ahead.

Parents Engage in Annual Singapore Math Workshop

Radians School recently hosted its Annual Singapore Math Workshop, welcoming parents for an engaging and interactive learning experience.

This highly anticipated event gave families the chance to step into the shoes of their children and explore the problem-solving strategies that make the Singapore Math approach so effective.

Throughout the workshop, parents participated in the same activities their children experience in class, including the use of visual models, number bonds, and step-by-step problem-solving exercises. By working through these activities, parents gained a clearer understanding of how Singapore Math builds strong conceptual foundations before moving into abstract concepts. Many shared that the activities challenged them to “think differently” about solving problems and helped them appreciate the depth of reasoning their children are developing.

One of the key highlights of the day was the collaboration between families and educators. Teachers guided parents through each step, showing how strategies used in the classroom encourage critical thinking, creativity, and perseverance. This direct involvement allows parents to better support their child’s learning at home, creating consistency and reinforcing skills beyond the classroom walls. The energy and curiosity of our parents made the event especially memorable. Their active participation reflected a strong commitment to their children’s education and to the Radians School community.

A COMMUNITY OF ENTHUSIASM

Workshops like this are more than just learning opportunities; they are a celebration of the partnership between families and educators.

We extend a heartfelt thank you to all who attended and contributed to the success of this event. Your enthusiasm makes a real difference in your child’s educational journey. Together, we are building the confidence and problem-solving skills that will prepare our students not only for academic success, but also for real-life challenges

DOMINA TU MENTE: EL MODELO CRECER

En Radians School seguimos fomentando el liderazgo estudiantil y el desarrollo integral de nuestros jóvenes. El pasado encuentro fue testigo de una experiencia transformadora gracias a la iniciativa de Daviana Pérez, estudiante de 11mo grado, quien ofreció una charla titulada: “Domina tu mente: El modelo CRECER para convertir tus luchas mentales en fortaleza mental”.

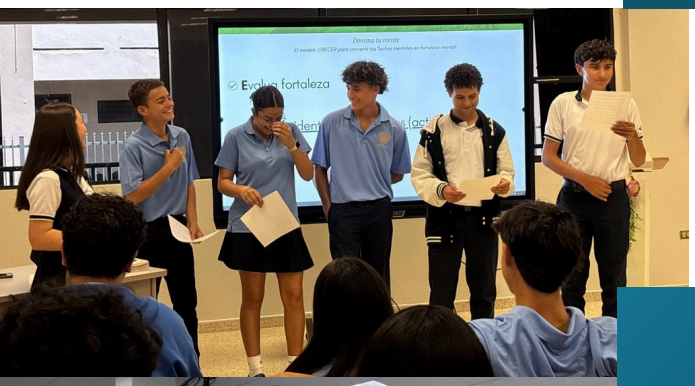

El modelo CRECER

Daviana presentó el modelo CRECER, una guía práctica y sencilla diseñada para ayudar a transformar las dificultades en fortaleza:

C: Conoce tu mente
R: Rompe el estigma
E: Equilibrio total
C: Crece ante los retos
E: Evalúa tu fortaleza
R: Retén tu visión

Cada letra se convirtió en un recordatorio poderoso de cómo los jóvenes pueden cultivar la resiliencia y mantener una visión clara de sus metas.

Recordatorio final:

Tu mente es poderosa. ¡Convierte cada lucha en una oportunidad de CRECER!

Troop 453G Excels at Guajataka Scout Reservation

We are proud to share that Troop 453G shone brightly at the Guajataka Scout Reservation, earning two prestigious awards. The troop received the Cruz del Sur Award for their outstanding scouting spirit and skills, while our girls were honored with the Sabores y Saberes Award, recognizing their creativity and cultural knowledge.

Beyond the awards, the experience strengthened camaraderie, leadership, and resilience—values that make scouting such a powerful journey. Congratulations to Troop 453G for representing Radians with pride!

For more information, please contact
Gabriela at (787) 568-4699.

Radians Students at The Summ: Student Experience Summit

Our high school students recently participated in The Summ: Student Experience Summit, where they connected with representatives from more than 30 universities and explored future career paths through hands-on activities.

From robotics and engineering to crime scene investigation and scientific experimentation, students experienced real-world learning that broadened their horizons and inspired them to think about their next steps in education and beyond.
